as for body percussion:

1. There are two groups. As long as "B.P. 2" - staff is empty or missing, do as "B.P. 1" says.  
Otherwise assign a considerable smaller group of singers to "B.P. 2".
2. Rubbing palms: I suggest to place your palms in a 90 degree angle (like a cross) and move only one hand.
3. Finger snapping: In this song your snapping should be "dirty". Snap with both hand and try NOT to be too tight.
4. Stomp - chest - clap: In order to match the tempo I suggest to use a back-hand clap in combination with the chest slaps. I do it like this:  
I am right-handed so I ready my left hand in front of the left part of my chest in a distance of approximately 20 centimeters.  
After slapping my left chest with the palm of my right hand I clap in a reverse movement with the back of my right hand and my waiting left hand.

as for vocal sounds:

1. The general sound is soft and in a small dynamic range, nearly spoken and with a bored (and maybe sarcastic) attitude.
2. All notes with cross-heads are spoken, a variety of spoken sounds is welcome so don't waste effort to match individual sounds
3. Tenors will have parts with vocal percussion. These Hi-Hat-sounds must be tight but not tense.
4. Basses: sorry not much variation for you here, but watch out for different tone lengths in different parts.
5. Altos: "ha!" in the chorus parts is special. Come in with an aspirated "(h)ah", then raise the pressure for a crescendo, finally cut the sound by closing the glottis abruptly. You can also imagine the reversed sound of a released breath after a glottal stop.
