String Pad 7

The Intro section consists of five staves of music. The first staff is a grand staff (treble and bass clef) in 4/4 time, featuring a string pad with a 7-measure rest in the treble and a rhythmic pattern of eighth notes in the bass. The subsequent four staves are single staves in bass clef, continuing the string pad texture with various chordal and melodic lines, including a section marked *pp* (pianissimo) with a 7-measure rest.

Chorus 1

Chorus 1 begins at measure 41. It is written on a single staff in treble clef, featuring a series of chords and melodic lines with long, sweeping ties across measures.

Interlude 1

Interlude 1 begins at measure 49. It is written on a single staff in treble clef, featuring a series of chords and melodic lines with long, sweeping ties across measures.

Verse 2

Verse 2 begins at measure 57. It is written on a single staff in treble clef, featuring a series of chords and melodic lines with long, sweeping ties across measures.

Verse 1 She's got a smile that it seems to me
Reminds me of childhood memories
Where everything was as fresh as the bright blue sky.
Now and then when I see her face
She takes me away to that special place
And if I stared too long I'd probably break down and cry

Verse 2 She's got eyes of the bluest skies
As if they thought of rain
I hate to look into those eyes and see an ounce of pain
Her hair reminds me of a warm safe place
Where as a child I hide
And pray for the thunder and the rain to quietly pass me by.

Chorus 2 Whoa wo, wo sweet child o' mine

Vocal Tips “Sweet Child O’ Mine”

Laat de Sopranen in het eerste couplet (solo) zoveel als mogelijk in metalen stemfuncties zingen (Curbing, Overdrive & Edge). Neutral is voor deze stijl nummers, in het midden en de laagte van de stem, meestal niet pittig genoeg. Het is vaak niet hard genoeg en mist “body”. Wanneer de sopranen in Neutral zingen dan kun je met meer “Twang” proberen de klank een beetje “scherper” en lichter te maken, ook in een hogere ligging. Misschien zelfs met vibrato op bepaalde tonen.

De solo van de Tenoren is geschreven in een ligging waardoor ze in het algemeen veel in metalen stemfuncties zingen. Is het geluid niet scherp of licht genoeg, laat de zangers dan met meer “Twang” en met minder ruimte in het spraakkanaal zingen. Met spraakkanaal bedoelen we de gehele mondholte van de stemplooiën tot de lippen of de neus.

Let erop dat bepaalde stemgroepen, wanneer ze in de hoogte zingen, niet te klassiek klinken doordat ze veel ruimte in het spraakkanaal maken. Anders krijg je geen mooie “blend” met de andere stemgroepen.

Wanneer solo zangers bepaalde gedeelten van het arrangement zingen met gebruikmaking van effecten (bijvoorbeeld Distortion, Creaking etc.), dan moeten ze op een paar dingen letten:

- het is mogelijk om effecten te realiseren zonder dat ze schadelijk zijn, zonder dat je hees wordt; wees niet bang voor een bepaalde klank (sound); een klank kan nooit schadelijk zijn voor je stem alleen een ongecontroleerde vernauwing
- je moet de 3 basisprincipes onder de knie hebben (ademsteun, noodzakelijke twang, geen vooruitgestoken kaak en/of lipspanning)
- je moet de stemfuncties beheersen
- je moet de klankkleur beheersen
- het mag nooit pijn doen of onaangenaam aanvoelen
- het kost vaak meer energie om een effect aan een klank toe te voegen
- effecten zijn gekoppeld aan emoties; effecten klinken pas authentiek wanneer je de emotionele ervaring achter een song voelt

Vocal Tips “Sweet Child O’ Mine”

Try to let the sopranos sing as much as possible in metallic modes (Curbing, Overdrive & Edge) in the first verse. Neutral is, in the middle and low part of your voice, not solid enough for this musical style. It often lacks power and “body”. When the sopranos do sing in Neutral then you can try to make the sound sharper and lighter by adding a bit more “Twang”, also in a higher vocal range. Maybe you can even add some vibrato.

The solo part of the tenors is written in a vocal range where they generally sing in metallic modes. When the sound is not sharp or light enough you can let them sing with more Twang and less space in the vocal tract (the whole mouth cavity from the vocal folds to the oral or nasal passage).

Make sure that specific voice groups don’t make too much space in the vocal tract when singing high parts. The result would be a classical sound which causes blending-problems with the other voice groups.

When parts of this arrangement are sung by soloists and they want to use some effects (for example Distortion, Creaking, etc.) they have to obey some rules:

- it’s possible to produce healthy effects without getting hoarse or damaging your voice; don’t fear sound, a sound can never strain your voice only uncontrolled constrictions might strain
- you have to be in control of the overall principles of singing (support, necessary twang, avoid protruding the jaw and tightening the lips)
- you must be able to control the modes
- you must be able to control the sound colour
- it must never hurt or feel uncomfortable
- it usually costs more or extra energy to add an effect to sound
- emotions must be a part of the effect; unless the singer can produce the emotion underlying a song the listener will not sense authenticity behind the effect
